No. MRN/HMR/99/19

H.M.(R)'s Office
Dated: 19/12/2023

NOTICE

It has been observed for the last seven days; that the actual rise of tide during high water time; at Sagar, Gangra & Haldia is on an average 0.20 miter lower than the predicted rise (.)

In view of the above, the predicted draft for Haldia is being reduced by 0.2 miters for inward bound and outward bound vessels for all the categories till the situation comes back to normal.
